Are you suffering from itching, eczema and redness?

Reduce inflammatory symptoms with Gladskin Eczema
Why Gladskin Eczema?
Research shows that the use of Gladskin Eczema
- reduces itching and redness
- prevents inflammations
- reduces the user’s need for hormonal cream
- remedies sleeping problems

Gladskin Eczema is well-tolerated by sensitive skin, even with continuous use. The product can be used on all body parts. The products do not contain any perfume, parabens, alcohol or acids.

“I couldn’t believe it at first, but now I can’t deny it any longer; the cream feels really good and calmed my eczema.”

Other people’s experiences provide a clear image of what you can expect. Visit www.gladskin.com/reviews to read hundreds of user reviews.
Bacteria on your skin
Your skin is the home of billions of bacteria, both good and bad. The numerous good bacteria are essential to a healthy skin. If you are suffering from acne, the bad bacteria can cause or increase inflammations and itching.

How does Gladskin Eczema work?
Eczema comes in various forms, constitutional (also called atopic) eczema being the most common variant. It’s not yet clear what causes constitutional eczema, but the Staphylococcus aureus bacterium plays a big part in it. These bacteria can also cause inflammations in other eczemas, such as contact eczema or seborrheic eczema.

Staphefekt™ is the active ingredient in Gladskin Eczema. It will only kill the bad Staphylococcus aureus bacteria. If you have eczema, this bacterium can cause or worsen inflammations and irritable skin. Because only the bad bacteria are killed, the good bacteria stay untouched and will reduce inflammatory symptoms, such as itching, redness and swelling.

Where to buy?
Online at www.gladskin.com/eczema or at your local pharmacy.
Gladskin has developed products for people with acne, eczema, rosacea and irritable skin.
